Notice of Supervisee Status

NOTICE OF THERAPIST SUPERVISEE STATUS

Your assigned therapist is currently completing the experience requirements to obtain a professional license to provide mental health care. This means that your therapist is being clinically supervised by one or more licensed clinicians at our office (a "supervisor").

To ensure quality of care, your therapist will meet regularly with a supervisor to discuss your care, in accordance with Pennsylvania regulations. You may be asked to consent to occasional videotape or audiotape of appointments, as part of this supervision.

Supervision may take place in person or via technology. The use of technology in supervision allows supervisors to remotely review electronic records and, if you have provided specific permission, video recordings. This enables the supervisor to provide useful and rapid guidance for your care.

Where technology is used, safeguards are in place to protect your privacy. While we only use technologies we believe to be secure and meet HIPAA standards, there is always a small risk of data loss or interception. If you have any questions or concerns about the use of technology in supervision of your care, please ask.

If the supervisee fails to maintain ethical and legal standards of care, or engages in conduct that causes client harm, the supervisor may contact the appropriate State Board regarding your case.

If at any time you have concerns regarding your care, you may contact our Director. If you wish to speak with the clinical supervisor, our Director or your therapist can provide you the supervisor's name and contact information.

Liz Campbell, Ph.D. - (717) 422-6440, ext. 21

I have been informed that my therapist is providing services under the supervision of a licensed therapist and supervision may be provided via technology. I acknowledge the risks and limits to confidentiality as described above.
